PROFESSIONAL EXPERIENCE

Frontend Developer

Appium Logics Solution | April 2024 – June 2024

I anticipate immersing myself in real-world projects, and honing my skills alongside seasoned professionals. From crafting captivating user interfaces to optimizing performance, each task promises growth and learning. I'm ready to embrace challenges, celebrate milestones, and shape experiences that resonate globally.

Frontend Developer

Bytewise Limited | April 2023 – July 2023

As a Front End Developer at ByteWise Limited, I always encouraged teamwork and open communication. My commitment to sharing experiences played a big part in making our team more productive and successful in creating user-friendly web applications. During my time at ByteWise, I worked on various projects that challenged and helped me grow.

PROJECTS

Tour & Travel Agency

This is my semester Project named as Tourista.pk uses HTML, CSS, and JavaScript to create a user-friendly interface. JavaScript adds dynamic features for a better experience. PHP handles server-side tasks, making things run smoothly, and MySQL stores data securely. This combination ensures Tourista.pk is not only visually appealing but also efficient, secure, and scalable.
