- Working as a React Developer at NERDFLOW, focusing on building dynamic and responsive user dashboards.
- Worked on a company product as well that was targeted the niche of restaurant, worked on a menu-items order management as well where we can track the order from both user end and admin end.
- Utilized technologies such as React, Redux Toolkit, and RTK Query to manage state and API integrations efficiently.
- Collaborated on creating custom themes optimized for performance and seamless user experience across devices.

ReactJs Developer | Appium Logics Solution | Remote **April 2024 – August 2024**

- Contributed to a dynamic team, working on real-world projects to enhance front-end development expertise.
- Designed engaging user interfaces and optimized web performance to ensure seamless user experiences.
- Collaborated with experienced professionals, gaining insights into modern technologies and best practices.
- Specialized in HTML, CSS, JavaScript, and React.js, building fast and responsive web applications.
- Stayed updated on industry trends, integrating innovative solutions into projects.
- Consistently delivered high-quality, client-focused solutions that drove business success.

Frontend Developer Intern | Bytewise Limited | Remote **May 2023 - August 2023**

- Fostered a collaborative work environment by encouraging teamwork and open communication.
- Played a key role in improving team productivity while developing user-friendly and responsive web applications.
- Gained hands-on experience by working on diverse projects, creating intuitive interfaces tailored to user needs.
- Shared knowledge and expertise to support the professional growth and skill development of the team.
- Consistently delivered high-quality results, meeting 100% of project deadlines, even under tight time constraints.

PROJECTS

EveryClinic (Healthcare SaaS Platform)

- Appointment Management: Built appointment booking, scheduling, filtering, search, and status management workflows.
- Dentist Schedule & Calendar: Developed calendar-based scheduling and dentist availability management.
- Clinic & Service Management: Implemented clinic, practitioner, featured services, and service management modules.
- Voucher Management: Developed voucher creation, validation, and discount rule implementation.
- Stripe Integration: Integrated Stripe payment and payout workflows.
- Authentication & Authorization: Implemented secure authentication, protected routes, and role-based access.

Lead Finder Zoho CRM (Zoho Makretplace Extension)

- Built the complete frontend UI for Lead Finder, ensuring a clean, modern, and user-friendly interface.
- Integrated frontend with LinkedIn data APIs to display real-time user profiles, posts, and job information
- Optimized UI performance for fast loading, smooth transitions, and better user engagement.
- Solved real-world usability problems by creating intuitive layouts for lead insights and LinkedIn activity visualization.
- Implemented responsive design and loading animations for a professional and seamless user experience

SmartCricket Website (University Final Year Project)

- Designed a user-friendly interface in Figma and built it using React.js, Tailwind CSS, Framer Motion, and DaisyUI.
- Implemented core features including match analysis, player performance comparison, and team rankings to enhance user engagement.
- Built a fully responsive frontend ensuring smooth performance across desktop and mobile devices.
- Integrated MySQL with Flask for secure user authentication and efficient database management.
- Built the project using React.js, Flask, MySQL, DaisyUI, Framer Motion and Tailwind CSS for a reliable and efficient application.

Preplify (An Interview Assistant)

- Developed the frontend UI for Preplify, an AI-based interview preparation platform, focusing on clean layout and user-centric design.
- Implemented responsive design for seamless performance across desktop and mobile devices.
- Collaborated with product team to translate interview-prep workflows into intuitive, scalable, and maintainable frontend components.

EDUCATION

Bachelors in Software Engineering | NUML Islamabad, Pakistan | 2021-2025

SKILLS

HTML5	Github	React Redux Toolkit	VueJs
CSS3	Figma	MySQL	NuxtJs
JavaScript	React Js	Tailwind CSS	Vuetify
Bootstrap	Daisy UI	Accertinity UI	NextJs
Material UI	Context Api	React Query	Problem Solving
